

Wilcox Solar Observatory
740 Junipero Serra Blvd.

There is a secured gate at Frenchman's Creek. To get through, you will need to retrieve a card from a lockbox on the driver's side near the gate. The code is 49310: enter the code and press down on the release button, remove the card and put it up against the card reader, arrow side up. To relock the lockbox, the release button must be depressed...so if you let go of it while opening the gate, you will need to re-enter the code.

There is a similar lockbox on the other side of the gate to get out, so be sure to take these instructions with you. If you have trouble, call Jeneen: 1(650)623-7370.

Please carpool if you can, and be mindful of the hikers on the way up the hill.
